Empathy Map – OptiCrop

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I want to grow the most suitable crop for my soil and climate." • "I am not sure which crop will give better yield and profit." • "Weather is unpredictable these days." • "I need reliable advice before planting."	THINKS • "Which crop will grow best in my soil and current weather?" • "How can I maximize my yield and income?" • "Will the crop be resistant to diseases and pests?" • "How can I reduce the risks in farming?"
PERSONA NAME <i>(Role / User Type)</i>	
DOES • Analyzes soil nutrients (N, P, K), pH, temperature, humidity, and rainfall. • Compares different crop options. • Seeks suggestions from experts or other farmers. • Uses digital tools and apps for information.	FEELS • Worried about crop failure and financial loss. • Unsure about the right crop to choose. • Hopeful for better yield and higher profit. • Confident when decisions are based on accurate data and AI recommendations.
